

# Insulated Fibreglass (FRP) Step Stool & Work Platform

Category: Insulating Tools, Ladders & Detectors    Product code: insulated-frp-step-stool

Insulated FRP/GRP step stool and work platform for standing work near live equipment in substations, switch rooms and transformer bays. Weatherproof and non-absorbent, with a ribbed anti-slip platform and a 300 kg load rating.

## SPECIFICATIONS

|                  |                                                                                |
|------------------|--------------------------------------------------------------------------------|
| Material         | FRP / GRP (epoxy resin with fibreglass reinforcement)                          |
| Types            | single layer / double layer / three layer / four layer                         |
| Single layer     | height 20-50 cm, platform 40 x 40 cm                                           |
| Double layer     | height 80 / 100 / 120 cm, platform 30 x 50 cm                                  |
| Load rating      | up to 300 kg                                                                   |
| Platform surface | ribbed anti-slip                                                               |
| Feet             | rubber pads                                                                    |
| Weathering       | UV-resistant outdoor coating, corrosion-resistant resin, non-absorbent surface |
| Handling         | D-shaped handle; removable castors on larger sizes                             |
| Cleaning         | wipe with a dry or slightly damp cloth; no solvents or pressure washing        |

## PACKAGING & DELIVERY

|           |                                                    |
|-----------|----------------------------------------------------|
| MOQ       | 10 pieces                                          |
| Packaging | 32 x 52 x 122 cm, gross weight 14.5 kg             |
| Lead time | 15 days for 1-10 pieces; 30 days for 11-100 pieces |
