

# 110 kV Zinc Oxide Surge Arrester HY10WZ-108/268

Category: Grounding, Earthing & Lightning Protection

Product code: surge-arrester-110kv-hy10wz-108-268

Composite-insulated zinc oxide surge arrester for substation and transmission line duty, model HY10WZ-108/268, in a silicone rubber housing.

## SPECIFICATIONS

|                 |                                                              |
|-----------------|--------------------------------------------------------------|
| Product Name    | 110 kV Composite-insulated Zinc Oxide Surge Arrester         |
| Model Number    | HY10WZ-108/268                                               |
| Type            | Metal-oxide (zinc oxide) surge arrester, composite insulated |
| Material        | Silicone rubber, zinc oxide                                  |
| Application     | Substation, transmission lines                               |
| Brand Name      | YJH POWER                                                    |
| Place of Origin | Hebei, China                                                 |
